Journal of Statistical Planning and Inference 36 (1993) 431–432
North-Holland

Author Index Volume 36 (1993)*

Bai, Z.D., C.R. Rao and L.C. Zhao, MANOVA type tests under a convex discrepancy function for the standard multivariate linear model (1) 77– 90
Baksalary, J.K. and P.R. Pordzik, Preliminary test estimation of a vector of parametric functions in the general Gauss–Markov model (2,3) 227–240
Baksalary, J.K. and I. Siatkowski, Decomposability of the C-matrix of a two-way elimination of heterogeneity design (2,3) 301–310
Basawa, I.V., *see* S.Y. Hwang (1) 57– 67
Bérubé, J. and G.P.H. Styan, Decomposable three-way layouts (2,3) 311–322
Caliński, T., Balance, efficiency and orthogonality concepts in block designs (2,3) 283–300
Chen, H.J., M. Xiong and K. Lam, Range tests for the dispersion of several location parameters (1) 15– 25
Cook, R.D. and S. Weisberg, Residual plots in up to four dimensions (2,3) 141–150
Cutler, D.R., Efficient block designs for comparing test treatments to a control when the errors are correlated (1) 107–125
Draper, N.R., N. Gaffke and F. Pukelsheim, Rotatability of variance surfaces and moment matrices (2,3) 347–356
Eccleston, J.A., J.A. John and D. Whitaker, Some row–column designs with adjusted orthogonality (2,3) 323–330
Einmahl, J.H.J., Confidence bands for the quantile function under random censoring (1) 69– 75
Eubank, R.L. and V.N. LaRiccia, Testing for no effect in nonparametric regression (1) 1– 14
Fujikoshi, Y., Asymptotic expansions for the standardized and Studentized estimates in the growth curve model (2,3) 165–174
Gaffke, N., *see* N.R. Draper (2,3) 347–356
Ghosh, S. and H. Talebi, Main effect plans with an additional search property for 2^m factorial experiments (2,3) 367–384
Gupta, S.S. and K.J. Miescke, On combining selection and estimation in the search for the largest binomial parameter (2,3) 129–140
Heiligers, B., Linear Bayes and minimax estimation in linear models with partially restricted parameter space (2,3) 175–184
Hwang, S.Y. and I.V. Basawa, Parameter estimation in a regression model with random coefficient autoregressive errors (1) 57– 67
Irony, T.Z., Information in sampling rules (1) 27– 38
John, J.A., *see* J.A. Eccleston (2,3) 323–330
John, J.A., D. Whitaker and C.M. Triggs, Construction of cyclic designs using integer programming (2,3) 357–366
Kleffe, J. and J.N.K. Rao, Inadmissibility but near optimality of an estimator of correlated response variance under additive models (2,3) 151–164
Klonecki, W., A. Wiggins and S. Zontek, Strictly positive estimators for variance components (2,3) 241–252
